

## Travel Instructions

### From Arlanda airport

Take Arlanda Express directly from the terminal (north stop at terminal 5, south stop at terminals 2-4) to Stockholm central station. The train ride is 20 minutes and the trains leave every 10-15 min. Buy the ticket online or in machines at the terminal, more info and time tables at <https://www.arlandaexpress.com>. From the central station, take the subway to the university.

### By subway

Take the subway red line (#14) to Mörby centrum, get off at "Universitetet" (the University). There is only one exit from the subway, walk up the stairs and follow the path that leads slightly to the left (see the yellow line on the map in the next page). Walk past the green building to the Arrhenius laboratory.

### By car (involves congestion taxes)

GPS: lat 59,3676 long 18,0561

#### *From the north*

Drive E4 south towards Stockholm, take the exit to E18/Norrtälje at Järva krog. Drive past Bergshamra, and then take the exit to Norrtäljevägen towards Stockholm. Take the first exit from that road towards Bergianska/Naturhistoriska riksmuséet. Pass under the motorway, and then follow the small road to the right that passes in front of the museum. Turn left at Svante Arrhenius väg.

#### *From the south*

Drive E4/E20/Essingeleden north, passing Stockholm. Keep in the right two lanes first, then take the left exit to Norra länken and keep left when you drive in the long tunnel (Galaxtunneln), which exits in front of Stockholm University. **NB:** The signs are difficult to follow! Continue the road ahead until the next exit to the right, towards Bergianska/Naturhistoriska riksmuséet. Turn right twice, and follow the small road to the right that passes in front of the museum. Turn left at Svante Arrhenius väg.

Details on the current traffic situation can be found here:

<https://trafiken.nu/stockholm/arkiv/2017/hur-kor-jag-nu/>

### **Parking**

Park in front of the Frescati Hall (**blue P**). A larger parking area is found south of the university campus (**red P**).

### The Arrhenius laboratory:

is the concrete/orange building located on **Svante Arrhenius väg 16C**. See the map below; follow the **yellow line** from the subway, the **blue line** from the north parking, or the **red line** from the south parking.

The department of organic chemistry is located in building A, level 6 (marked with **X** on the map). The door to the department is locked, use the doorbell outside.
