

# Hot Topics in Organic Chemistry

A series of intensive courses for PhD students, post docs and industry  
7.5 hp, spring 2010

## Part I. Hypervalent Iodine Chemistry

Coordinator: Berit Olofsson

At Stockholm University, Arrhenius Laboratory, Magnéli Hall

*February 15-16<sup>th</sup> 2010*

Detailed schedule available

## Part II. Medicinal & Process Chemistry

Coordinator: Per Arvidsson

At AstraZeneca Södertälje

*March 23<sup>rd</sup> 2010*

## Part III. Artificial Photosynthesis & Heterocyclic Chemistry

Coordinators: Björn Åkermark & Jan Bergman

At Stockholm University and KTH

*April 27-28<sup>th</sup> 2010*

## Part IV. Enzyme Catalysis in Organic Chemistry

Coordinators: Jan-Erling Bäckvall & Per Berglund

At Stockholm University

*May 5-6<sup>th</sup> 2010*

The course topics have been selected to cover interesting areas of organic chemistry that are generally not discussed in advanced synthetic organic courses. The dates for parts II-IV are preliminary, definite dates will be determined in January. Detailed schedules will be provided approximately one month before each part at <http://www.organ.su.se/bo/Courses.html>

Participants can choose which course parts to attend. Register by email to Berit Olofsson ([berit@organ.su.se](mailto:berit@organ.su.se)), **deadline February 5<sup>th</sup>**. For attendance only to later parts of the series, it is possible to register directly to that coordinator upon announcement of that schedule.

For students who want the 7.5 hp, all course parts are compulsory. Examination will be performed by hand in questions, which are provided in each course part.

**Coordinator:** Berit Olofsson, Stockholm University
